

Minutes from OpenPICs WP3 meeting 20-11-2017

Present: Weiming, Rui, Huub, Meint, Victor, Xaveer, Saeed, Michael, Steven, Ronald

Time: 14:00-15:00

Discussion/action points

Nr.	Description	Responsible
1.	Mach Zehnder Modulator Weiming presents electrical measurement on Mach Zehnder modulator from SP20. Semi-insulating substrate leads to very low loss and high bandwidth. Further measurements on EO bandwidth to follow.	
2.	Spot size converters SSC wafer has been finalized (WIPE project) and measurements will soon been performed on the characteristics of the SSCs by Smart.	
3	Grating strength Saeed presents data on SP19 grating characterization from Effect. Nominal kappa can be reached (50 cm ⁻¹) but small variations with length observed.	
4	Form of Meetings Bi-weekly technical meetings will end with this one. Monthly meetings on project planning level will follow in 2018. Technical discussions will be held offline in small group meetings.
